

## From a Mobile Device

These cards use 'QR Codes' to help you connect to things. QR Codes are like barcodes that your tablet or mobile device can read. They contain links to websites, to apps or sometimes just contain information.

To use them, you need to have a 'QR Reader'.

If your tutor has already installed it on your device, you will see a button that looks like this.

i-nigma

- ✓ Click on it to open the app
- ✓ Point the rear camera at QR Code 1
- ✓ Read the message
- ✓ Point the rear camera at QR Code 2
- ✓ When it displays the link for the website, click 'go online'

### Code 1

## From a Computer

Most of our QR codes are "clickable" from a computer. That means, if you're viewing this on your computer you can

- ✓ Move your mouse over QR Code 2
- ✓ Click once, normally with the left mouse button
- ✓ If you are asked if it's OK to follow an external link, click on OK.

### Code 2

QR Codes that only work on mobile devices are not clickable.

## From a paper copy

At the start of each section, the links for each QR code are listed. You can type the links in and use them that way too!
